# Craftsman Collection

**Authentic ambiance for your home**

The Craftsman Style derived its name from house designs published in "The Craftsman", an influential magazine produced under the direction of architect and designer Gustav Stickley.

## **AK Mahogany Asian Knotty Alder**

Craftsman doors often have simple geometric designs like those found in Prairie style entrances: small squares or tall and narrow panes of glass set side by side.

**BGD offers the rich warm woods of our signature AK mahogany and Asian Knotty Alder. All BGD doors are constructed with engineered stiles and rails to add strength and resist warping. The cores are solid core block and the facing surface is 1/8" laminate.**
